## Preface

The following conventions are used in this document:

<b>Bold</b>	Used for information that is typed, pressed, or selected in executables and instructions. For example, select <b>connect to host</b> .
<i>Italics</i>	Used for file names, directories, scripts, commands, user IDs, document names, and Bibliography references; and any unusual computerese the first time it is used in text.
<u>Underline</u>	Used for emphasis.
Arrows <>	Used to identify keys on the keyboard. For example <Return>.
“Quotation Marks”	Used to identify informal, computer-generated queries and reports, or coined names; and to clarify a term when it appears for the first time. For example “Data-Generation Report.”
Courier Font	Used to denote anything as it appears on the screen or command lines. For example <code>tar xvf dev/rmt/3mm</code> .
Capitalization	Used to identify keys, screen icons, screen buttons, field, and menu names.

# 1. Installation Procedures for IRCC

This document provides a quick reference for installing the Internet Relay Chat Client (IRCC) segment onto Sun or HP-based Defense Information Infrastructure (DII) workstations.

## 1.1 Pre-Installation Instructions

**NOTE:** The IRCC segment requires the TCL segment. Therefore, you must install the TCL segment before installing the IRCC segment.

An IRC server should be installed on the application server machine for your site.

When using the COE Installer to install this segment, pay close attention to and follow all instructions provided. Make note of any warning messages displayed during the course of the installation.

## 1.2 Installation Walkthrough

Step 1: To install the IRCC segment, select the IRCC segment on the COE Installer's Select Software to Install window and press the **Install** button.

Step 2: When prompted, enter the name of the IRC server machine you wish to connect to.

Step 3: If the server machine entered cannot be located on the network, the following message is displayed:

`<server machine> does not respond to ping. Use it anyway?`

To use this server machine, type a **Y** and press **<Enter>**. However, to select a different server machine, type an **N** and press **<Enter>**. You will be prompted again to enter a server machine name, as shown in Step 2.

## 1.3 De-Installation Procedures - IRCC

To de-install the IRCC segment, select the IRCC segment from the COE Installer's Currently Installed Segments window and press the **Deinstall Software** button.
